Fax (847)548-4335

The risk of acquiring any blood borne infection from an orthodontic office is extremely remote, Grayslake Orthodontics follows strict infection control procedures to protect all patients and employees from diseases such as HIV/AIDS and hepatitis. Staff members receive infection control training under the guidelines of OSHA. Staff also receives a series of hepatitis vaccinations. Our office maintains compliant safety guidelines established by OSHA and the American Dental Association.

Grayslake Orthodontics' Staff will...

- Wear new gloves for each patient.
- Use masks and safety glasses whenever indicated.
- Sterilize all instruments after each use.
- Use disposable products when possible.
- Ensure surface disinfection is done on a regular basis.
- Place new tray covers for each patient.

As your orthodontic provider, Grayslake Orthodontics has certain health and safety responsibilities to its patients and staff. We will make every effort to provide an environment in the office that is free of any anticipated health hazards.
