In order to maintain our exceptionally high standards of quality care, it is important to schedule adequate time for appointments. Many parents request after school or work appointments. This is understandable, however, not always possible. Some orthodontic services require morning and mid-day office hours in order to allow sufficient time for the procedure and to develop a positive working relationship with our patients. Therefore, we require longer appointments (40-90 minutes) be scheduled in the mornings. These longer appointments will generally include appliance placement and removal appointments.

While in braces, the orthodontic appointments are usually 4 to 8 weeks apart and relatively short (10-20 minutes). These shorter appointments can be any time during our regular working hours.

Our office will make every effort to schedule after school or work appointments, on an equitable basis, according to the nature of the work planned. However, virtually all patients will require earlier appointments for a few of their orthodontic visits.

We know that your time is valuable and you want to avoid unnecessary waiting room delays. Therefore, when you have a scheduled appointment with us, you can expect to be seen on time or with a very minimal wait.

We hope to work with you to minimize any scheduling conflicts that may arise with school and work hours. Thank you for your cooperation when scheduling appointments.
